## RELEVANT EXPERIENCE

### SOFTWARE ENGINEER

Parametric Solutions, Inc. (PSI), Hartford, CT

JUNE 2017 - PRESENT

- Save the Quality department hours of manual work per week by writing SQL views and pivot tables.
- Perform database migrations to use SQL Server and integrate a React Native timesheet application.
- Automate data analysis on the health of Pratt & Whitney engine test facilities.
- Serve as communication intermediary between project managers and the off-site IT team.

### FULL STACK DEVELOPER

Hartford Underground, Hartford, CT

JANUARY 2017 - PRESENT

- Introduced PHP templating to maintain consistency of information across the website.
- Used responsive design to make their website mobile-friendly.

### WEB DEVELOPER

Connecticut Gubernatorial Campaign, Hartford, CT

NOVEMBER 2017 - FEBRUARY 2018

- Rewrote the website for the candidateffttis running mate with a static site and provide ongoing support.
- Provided consulting with their affiliated PR firm to seek campaign materials for the website.

### REPOSITORY MAINTAINER

AMVernon Machine Learning Calendar, Hartford, CT

AUGUST 2017

- Used Naive Bayes Classification to generate Google Calendar events from a printable event calendar.
- Serialized events using Machine Learning, Regular Expressions, and Approximate String Matching.
- Packaged and published on the Python Package Index (PyPI) for use as both a script and a library.

### LINUX AND PYTHON INSTRUCTOR

Fairfield Warde High School, Fairfield, CT

MAY 2017

- Taught an introductory course on how to use a Linux Terminal as well as how to program in Python.
- Provided ongoing support to students who wish to apply their new skills at a hackathon.
- Offered course materials and exercises on my personal course website using Moodle.

### ANDROID DEVELOPER

Android Security Risk Assessment, Storrs, CT

AUGUST 2016 - MAY 2017

- Wrote the Android client to interface with a Flask REST API hosted on an Nginx/Gunicorn server.
- Configured Celery and Redis to enable the use of asynchronous tasks and enable greater concurrency.
